

Bastian Fischer

Vice President and General Manager

Oracle Utilities Global Business Unit EMEA

Bastian is a recognised industry leader with an extensive experience in the Utility industry, in IT technology, customer management and smart grid & smart home area. A regular speaker on the theme of Utility industry innovation, he is an active contributor to a variety of customer thought leadership initiatives and industry press articles on international level.

Before joining Oracle, Bastian Fischer held several leadership roles focusing on the Utility Industry transformation in USA, APAC and Europe. With his wealth of international experience and a profound understanding of IT as an enabler of change and innovation, he is currently leading the Oracle Utilities team in EMEA, setting the focus on strategic projects and smart grid initiatives as well as providing direction to the largest utility customers.

Bastian leads the Oracle Executive Customer Advisory Board for Utilities, setting the roadmap to enabling utilities in the roll-out of smart grid projects, embracing industry breakthrough innovations and adopting new and innovative business processes.

Bastian is member of The European Smart Metering Industry Group (ESMIG), the Institute of Electrical and Electronics Engineers (IEEE), the European Telecommunications Standards Institute (ETSI), the European Sensor Network Architecture (ESNA) and participates actively to the OECD Urban Roundtables of Mayors and Ministers.
