

Thomas Centner, Director, EADS EFW

Thomas Centner holds a Master equiv. degree in Mechanical Engineering from Dresden University of Technology with special emphasis in Automotive Engineering (2005) and has a graduation from apprenticeship as Mechanic from 1999. During his studies he was active in research for alternative engine concepts such as hybrid and hydrogen power drives with Daimler and BMW and in Rapid Prototyping with the University of Stellenbosch/South Africa. In 2005 he joined the DGH Group/Germany, which is one of the major die casting suppliers in Germany, working as Key-Account Manager. In 2008 he joined EADS EFW's Sales, Marketing and Customer Support. As Director Sales Aircraft Conversion and Technical Marketing he is responsible for sales of EFW's passenger-to-freighter conversion services including maintenance services as well as technical marketing and forecasting. Recent projects include the participation in EFW's recent sales campaigns as well as preparations and forecasts for future P2F activities.
