

Frank Baldinger, Director, Business Development, **Locomation**

Frank Baldinger studied Electrical Engineering at the Technical University of Eindhoven, NL, where he received his masters in 1985. He then joined with ASEA in Sweden in the process automation R&D department. Thereafter he joined the substation automation development team in the Netherlands of the newly formed ABB Company. Until 2000 he was product manager SA-systems of a Dutch process automation company. In 2000 he founded a new company together with Locomation for the development and marketing of their own SA-products. In 2003 they started the development of innovative new approach for MV SA-systems, called SASensor® together with the Dutch utility Alliander. Frank is director of business development within Locomation. He is active within Cigré B3 "Substations" and B5 "Substation automation and protection; CIGRE; member of IET, IEEE & KIVI and the Dutch national committee of IEC TC57.
