

**Friedemann Schmidt, Preclinical Safety, Sanofi Germany**

Friedemann Schmidt received his Ph.D. for Physical and Theoretical Chemistry in 2001 from the Technical University of Darmstadt in Germany. After working for 3 years as a chemoinformatics specialist in the R&D department at Aventis Pharma in Frankfurt/Germany, he moved to the Computer-Aided Drug Design department. His current position is a Senior Scientist in the Preclinical Safety department at Sanofi, with particular focus on predictive computational toxicology. He has been supporting and leading technology initiatives and discovery teams in the fields of diabetes, osteoarthritis, cardiovascular and respiratory diseases.
