

**Dr Andreas Scheel**

Head

Applied Assay Development

**EVOTEC OAI**

Dr. Andreas Scheel is Head of Applied Assay Development at Evotec OAI AG, in Hamburg, Germany. He is responsible for Assay Development of miniaturized HTS assays (biochemical and cellular assays) using a variety of proprietary and non-proprietary technologies. Additionally, he is in charge of the development of secondary assays and low-throughput compound profiling using biochemical, cellular and early ADMET assays.

Andreas Scheel studied Biochemistry at the University of Tübingen, Germany, where he also obtained his Diploma Degree. Dr. Scheel obtained his PhD from the University of Cambridge, UK, after working on intracellular membrane trafficking at the Laboratory of Molecular Biology, Medical Research Council. He joined Evotec in November 1997 and held various positions in the organization before he moved to his current position one year ago.
