

Martin Schubert, Head of Chemical Pharma Development, **UCB**

Martin Schubert is Director and Head of Chemical Pharmaceutical Development at UCB Pharma SA based in Braine L'Alleud, Belgium. After his PhD in Pharmaceutical Technology, Martin started to work in pharmaceutical companies in 2004, specifically in pharmaceutical manufacturing and development, focusing on drug product development activities throughout the entire compound life cycle from candidate selection to early/late clinical phases, up to market launch and line extensions. He is accountable for the pharmaceutical development of finished dosage forms with the required quality and productivity, coordination of DP development and supply activities, and responsible for ensuring state-of-the-art results in small molecule formulation and process design and development from laboratory up to commercial manufacturing.
