

Suranjith Seneviratne, Consultant in Clinical Immunology and Allergy, Royal Free Hospital

Suranjith completed his basic Medical Degree with First Class Honours, eight distinctions and ten Gold medals and was placed first in his year. He completed his MD in Internal Medicine and trained in Clinical Immunology and Allergy at the John Radcliffe Hospital in Oxford. He completed a DPhil in Molecular Immunology and Allergy at the Weatherall Institute of Molecular Medicine, University of Oxford as a Commonwealth Scholar.

He is currently a Consultant in Clinical Immunology and Allergy at the Royal Free Hospital and University College London. The UCL Centre for Immunodeficiency, Royal Free Hospital, is the largest Primary Immunodeficiency Centre in Europe. Prior to that, he was Consultant and Lead Clinician in Clinical Immunology and Allergy at St Mary's Hospital and Imperial College London, a world renowned Allergy and Immunology Centre, and the birth place of the widely practiced procedure of Allergen Immunotherapy over 100 years ago.

Dr Seneviratne is the President of the UK-Sri Lanka Immunology Foundation, an organisation that contributes to Immunology and Allergy education in Sri Lanka. He has authored 116 journal publications and was one of the UK principal investigators in the recently completed Pan-European adult Food Allergy study (EUOPREVALL). At present, he is the Principal Investigator of the STILLPAD-UK study, a prospective study of lung disease in Immunodeficiency. He is a member of the NIHR Bio-resource Genetic study on Primary Immunodeficiency patients and is involved in several molecular genetic studies on patients with Hyper IgM syndrome, LRBA deficiency, Hyper IgE syndrome, CVID, Complement deficiencies, Food Allergy and Mast Cell Activation Disorder.
