

Dr. Martin Hagström, Deputy Research Director, FOI

Martin Hagström was born in Stockholm, Sweden in 1963. He received a Master's degree in Aeronautical Engineering in 1988 and a Licentiate of Engineering in Optimisation and Systems Theory in 1993, both from the Royal Institute of Technology (KTH) in Stockholm. He has worked at the Swedish Defence Research Agency (FOI) since 1996 in the fields of weapons, protection and aeronautics. Currently responsible for the strategic support and management of the Swedish Armed Forces' research programme on weapons and protection Dr. Hagström has coordinated the C-IED related research activities covering a broad spectrum of disciplines and applications, from protection systems and technologies for detection of buried objects to models of cultural influence and social network analysis. He served in several different positions as manager and head of department. He is coordinating international projects and is a member of several international project steering committees. He maintains a large contact network within European industry and research organisations.
